

G2 Smart Gateway

Unleash the full potential of your smart lock.

- ☑ *G2 Smart Gateway Bluetooth WIFI Bridge for smart lock.*
- ☑ *Since fingerprint & card access users doesn't use mobile apps to unlock the door, therefore the uploading of unlock occurs. Only then the unlock data records will be uploaded to the cloud. Due to the timeliness cannot be assured, the smart gateway is required for those wanting to check the unlock records for time to time.*
- ☑ *Our Smart Gateway processes and transfers the data through Bluetooth and Wi-Fi dual signal. In this way, the lock does not need to connect to the internet but allow the user to retrieve real-time records.*
- ☑ *This smart gateway is an add-on to your existing Smart Lock and enables all lock function that initially works only in Bluetooth range to work remotely from anywhere such as:*
 1. Pass-code delete
 2. History log
 3. Battery indicator
 4. Remote unlock from anywhere

Pair G2 With Your Smart Lock and Control it With Your Smart Phone

Unleash the Full Potential of Your Smart Lock

- Track real-time lock records
- Unlock from anywhere
- Manage lock with more flexibility in real time
